THEIR STORY

THE HUMAN ARCHIVE

A project by Silicore Automation

What if you could preserve more than memories?

Voice. Stories. Expressions. Movement.

Preserve today. For tomorrow.

A project by **Silicore Automation**

PROBLEM

We preserve memories. But we still lose people.

- Photos preserve how someone looked.
- They rarely preserve voice, stories, expressions, and movement.
- Every day, irreplaceable human data disappears forever.

AI can’t recreate what was never recorded.

A project by Silicore Automation

Solution / Value Proposition

Their Story turns memories into a structured human archive.

- Capture voice, stories, video, expressions, and movement.
- Use AI to organize them into a private, searchable archive.
- Control access, inheritance, and future permissions.

Capture → Structure → Preserve → Control → Pass on

Future Human Legacy

A long-term vision where future generations could feel closer to the people who inspired them — not just through highlights, but through human presence.

An emotional future where memory becomes continuity —
preserving voice, character and presence for the generations that follow.

A project by Silicore Automation

Business Model

Recurring revenue plus premium capture experiences.

Founder Pre-Sale Packages

Early access bundles with lifetime memories and exclusive benefits.

Annual Subscription

Unlimited captures, secure storage, and ongoing platform updates.

Family Plans

Memories that connect generations under one plan.

Premium Upgrades

AI enhancements, custom storybooks, extended preservation.

The archive grows over time, and so does customer lifetime value.

A project by Silicore Automation

Competition

We are not cloud storage, genealogy, or an AI avatar app.

	Cloud Storage	Genealogy	Memorial Apps	AI Avatar Tools	Their Story
Lifetime-first	✗	✗	✗	✗	✓
Multimodal	✗	✗	✗	✓	✓
Privacy-first	✗	✗	✗	✗	✓
Future-compatible	✗	✗	✗	✗	✓

Our moat is not just software. It is the long-term human dataset.

A project by Silicore Automation

Market

A new category at the intersection of memory, legacy, and AI.

Starting with families, parents, grandparents, and premium users.

Expanding to shared family archives and future human-data infrastructure.

Digital Legacy

Preserve life stories, photos, videos, and memories for generations.

Family Memory Preservation

Help families capture, organize, and pass down what matters most.

Premium Consumer Subscriptions

High-value subscriptions for secure storage, AI curation, and features.

AI-Powered Personal Archives

Intelligent organization, search, and storytelling powered by AI.

Traction

Early traction validates emotional demand.

Where we are today

- Live landing page and brand launch
- Interactive prototype and UX direction completed
- Founder pre-sale activated
- Early interest from users aligned with the vision of human preservation

THEIR STORY
by Silicore Automation

Founding Team & Core Build Team

A multidisciplinary team with hands-on experience in AI-powered products, agent workflows, intelligent automation and enterprise software.

Fabrizio Corpora
Founder & CEO

Product Strategy · Enterprise Software · AI Systems Leadership

Giada Bevilacqua
COO

Operations · Project Delivery · Strategic Execution

Omar Faruk
AI / Full Stack Developer

Model Training · Data Processing Pipelines · AI Applications

Md Ekramul Haque
Full Stack Developer

AI Workflows · API Integrations · Product Delivery

Habibur Rahman
Front-end UI/UX Developer

UI/UX · Front-end Development · AI Product Interfaces

Backed by a team with practical experience across AI-powered products, agent workflows, intelligent automation and enterprise software through Silicone Automation.

PREVIOUS & NEXT FUNDRAISING

Bootstrapped to date.
Preparing for structured pre-seed growth.

Previous

- Bootstrapped by founder
- Brand, concept, and prototype funded internally

Next

- Strategic ecosystem support and early-stage funding
- MVP development
- AI infrastructure
- Privacy architecture
- Team building

Today → Pre-Seed → Seed

Plans for Hub71 and Abu Dhabi

Building Their Story from Abu Dhabi for global scale.

- Establish Abu Dhabi presence
- Build MVP and privacy architecture
- Access AI infrastructure and ecosystem support
- Launch pilots and grow early paid users
- Scale from Abu Dhabi to global markets

0–6 months: Set up and build

6–12 months: Pilot and validate

12–24 months: Raise and scale
